

## CLAMPING FLOAT

### USES & APPLICATIONS

The clamping Float is the main flotation device for use with the Reach and Rescue Pole system. The main function of the clamping float is to support the pole on the surface of the water. Can act as an individual body buoyancy aid.

### HOW TO USE

Open the yellow top section of the reach and rescue pole and insert the pole through the blue collar on the end of the float. Turn the yellow locking sleeve anti clockwise to secure the float in place. To remove, reverse the process.

### MAINTENANCE & PRECAUTIONS

Avoid dropping the float onto hard surfaces. Wipe dry after use. Periodically check the thread is clean and grit free – Clean with warm soapy water if necessary. Store in Reach and Rescue Kit bag. Ensure the locking nut is present on the sleeve.

### SPECIFICATIONS

- Material: Plastic coated foam
- Colour: Yellow
- Weight: 0.8kg
- Length: 30cm
- Diameter: 20cm
