

"It is a very useful tool."

- Joost van Ierssel, Rescue 3 Netherlands

For easy replacements, a Stanley Blade is used in Reach and Rescue's Rope Blade.

Rope Blade

USES AND APPLICATIONS

For use where a rope or line needs to be severed. Also used to cut other materials, such as harnesses, strapping, fishing wire and netting.

HOW TO USE

Attach the Rope Blade attachment onto the gold collar and remove the protective sleeve to expose the blade. Extend the pole to the required length and place over the material. Then pull down using the pole. The blade can be removed and replaced once worn or blunt.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting as damage will prevent the attachment from fitting securely. Ensure the blade is covered after use.

SPECIFICATIONS

- Weight: 200g
- Depth: 3cm (Mouth Opening: 6cm)
- Blade Length: Standard 'Stanley' blade
- Material: Aluminium
