

SUBSURFACE RESCUE RECOVERY HOOK

Combines with our Underwater Search Camera becoming an all-in-one solution for safe underwater rescue and recovery.

SAVING VALUABLE TIME ON YOUR RESCUES

HOW TO USE

First, use the underwater search camera to locate the object of your search. A key aspect of the Subsurface Rescue Recovery Hook's design are the sharp hooks, designed to latch onto the object and pull to the water surface.

MAINTENANCE & PRECAUTIONS

The sleeve fitting should be regularly tested on the pole top fitting, as damage will prevent the attachment from fitting securely. The hooks are replaceable.

SPECIFICATIONS

Material:	Marine Grade Stainless Steel
Width:	8.2cm
Hook Width:	1.5cm
Length:	51cm
Stock Code:	RRSSRH
